"OSHAWA'S LARGEST TIRE DOCTORS"

FRED V. SKINNER
President, Oshawa Skating Club

Ice Frolics of 1947

HERE have been so many important championship events scheduled for this season that the top notch figure skaters have been very busy indeed trying to arrange appearances in ice shows without interfering with their practise time for the various championships. The Oshawa Skating Club has been most fortunate in securing Miss Yvonne Shorman and Mr. Bob Swenning of the Skating Club of New York for Ice Frolics of 1947. Elsewhere in the programme you will see that these skaters have already won a great many championships in the United States and are well on the way to greater victories. Also among our guest artists are Mr. Gerard Blair, Junior Champion of Canada, University Skating Club, Toronto, Miss Marnie Brereton of the Granite Club, Toronto and the comedy team of Mr. Bill Hoag and Mr. Jack Hillier of Brantford. A very versatile and daring professional skater in the person of Mr. Gerry Lacroix of Sherbrooke, Quebec, will not only have you roaring with laughter but will give you many a thrill before the evening is over.

Our own Club members, those members of the costume committee who are not Club members, our Musical Director Mr. Fred Roy, the musicians and vocalists and our Club Professional Mr. Alex Fulton have all put forth their best efforts to make Ice Frolics of 1947 a real success.

Only through the generous and loyal support of the good people of Oshawa and vicinity is it possible for the Oshawa Skating Club to present entertainment of such high quality. May we express our sincere thanks for this support.

PROGRAMME BY MUNDY-GOODFELLOW PRINTING COMPANY LTD.
ENGRAVINGS BY OSHAWA ENGRAVING COMPANY

It's a Big Evening...Have a Coca-Cola

... time out for the friendly pause

"Snacks at our house" is an invitation that always rings the bell. No matter what the hour, when the young folks are out for a good time they can look forward to a real treat—when there's a bit of home cooking in the cupboard and

frosty Coca-Cola in the icebox.

Have a Coke says Jack to Jean, meaning, This certainly is a date to remember. The friendly pause, with ice-cold Coca-Cola, is the perfect way to climax a happy occasion—to make any occasion happier.

Authorized Bottler of "Coca-Cola"

Galass Engline---2000 r.p.m.

S CIENTISTS at Shell's research laboratories have designed and built an engine with a cylinder entirely of glass! This gives them "owl's eyes" to see—while the engine is running—just where the oil is and how it stands up to its job.

The cylinder is heat-resistant glass, precision bored to a tolerance of 2/1000 inch... and it is able to stand the explosions... the pressures... the tornado of flame burning at 3000° Fahrenheit!

By using a special stroboscopic device which seems to "stop motion" at 2000 r.p.m., Shell scientists can watch the oil droplets do their work as they leap from ring to ring under the impulse of a force 200 or more times gravity.

It's something to watch . . . and realize what a magnificent job of co-ordination has been done in the past by oil scientists and engine designers—working "in the dark."

With Shell's glass engine uniting theory with fact — you're the winner! Your car's motor—performing better, lasting longer—that's what Shell's glass engine means to you.

This kind of research originality and thoroughness is your guarantee that you can rely on the complete line of Shell motor fuels, Shell oils, greases and special products. Shell Oil Company of Canada, Limited, Toronto 1, Ontario.

Skating Club of New York

Selected

If you're interested in better living, dear lady, you should certainly know about Fiberglas.

Have you ever passed up a movie after shopping, because the frozen foods or perishables in your shopping bag would melt? There's a Fiberglaslined shopping bag on the way that can keep an ice-cream brick cold for hours, in 90° of heat.

Are you everlastingly dusting? Fiberglas Dust-Stop air filters, installed in your hot-air heating unit, trap

thousands of dirt particles before they can blow upstairs...your house is cleaner, your housework much lighter. If you could look between the walls of your refrigerator, chances are

you'd find Fiberglas there, too. Cold air, locked in by Fiberglas, keeps your food fresh. Same thing with your

kitchen range. Fiberglas blankets your oven . . . keeps heat inside, instead of heating the outside room. No waste heat means thriftier, more efficient cooking.

More theatres, hotels and other places of public assembly are swing-

ing to Fiberglas drapes and decorative fabrics. And there's good reason why colourful, easy-toclean Fiberglas fabrics are popular . . . they won't burn! Soon you'll be able to have fireproof, waterproof Fiberglas fabrics in your own home.

And here's something you've been waiting for! An ironing-board cover that won't burn! This

Fiberglas ironing-board cover is fireproof and waterproof . . . just slide your iron along to the reinforced Fiberglas end and forget it!

Imagine glass as soft as silk . . . ten

times stronger than steel! Fiberglas, made from pure, spun glass, is woven or pressed into various forms for countless uses. Light,

fireproof, waterproof Fiberglas won't rot or decay . . . lasts a lifetime! Because of these amazing properties, Fiberglas will soon be everywhere you turn. If it's "made with Fiberglas", it's modern!

Sales and Service

You get mileage—and more mileage—from the new and different Silvertown Tires, made of a new kind of rubber developed by B. F. Goodrich. New design gives wider, flatter tread for greater grip and safety, more even tread wear . . . and this longer wearing tread is supported by a tire body engineered 35% stronger.

OUTWEARS PRE-WAR TIRES

In more than seventeen million miles of road tests, the new Silvertowns have outworn—outdistanced—prewar tires. They are cooler-running, quieter on the road, and have greater resistance to bruising . . . and the new Road-Level tread gives greater traction and gripping power.

Get the new Silvertowns . . . the greatest mileage tires of all time . . . built by B. F. Goodrich, makers of over 32,000 articles of rubber, including footwear and industrial rubber products.

RIGHT FROM THE START

B.F. Goodrich

Congratulates

The Oshawa Skating Club

GOOD ICE

and

GOOD LIGHT

The Oshawa Public Utilities Commission is happy that it has been able to contribute in some way to the success of Ice Frolics of 1947. Supplying dependable power and water is an important item to any ice show and these two commodities are responsible for the smooth ice surface and the true light in which you view the skaters.

are synonymous to Perfect Skating

The Public Utilities Commission of the City of Oshawa
